Inspection

Type: ROUTINE INSPECTION

Date: SEP-29-2006

2.33 (b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

*** (b) Each research facility shall establish and maintain programs of adequate veterinary care that include:(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries.***

The following items were identified during the inspection which had already expired.

Item Description	Expiration date
Alimta injection (Cytotoxic Agent)	9/05
Dehydrated alcohol	4/02
Vetbond	1/05
Vetbond (2 boxes)	12/05
Microtainer (vacuutainer tubes)	1/06
Microtainer with EDTA (3 bags)	1/05
Vacuutainer SST tubes (4 boxes)	1/06
Unopette	9/02

Medical materials are often imprinted with an expiration date, beyond which the manufacturer does not guarantee the safety or stability of the item. The use of outdated medical materials is undesirable, as these materials may lose their potency or degrade to toxic byproducts if stored after the expiration date. All expired medical materials must be identified and properly disposed of or properly labeled and stored in an area separate from non-expired medical materials. A system must be in place to identify and control expired medication and supplies used on regulated animals, so that potential risks of health hazards to animals could be prevented. These items were corrected during the inspection.
