Inspection

Type: ROUTINE INSPECTION

Date: MAR-09-2006

2.31 (e)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

A proposal to conduct an activity involving animals, or to make a significant change in an ongoing activity involving animals, must contain the following:

- (1) Identification of the species and the approximate number of animals to be used;
- (2) A rationale for involving animals, and for the appropriateness of the species and numbers of animals to be used;
- (3) A complete description of the proposed use of the animals;
- (4) A description of procedures designed to assure that discomfort and pain to animals will be limited to that which is unavoidable for the conduct of scientifically valuable research, including provision for the use of analgesic, anesthetic, and tranquilizing drugs where indicated and appropriate to minimize discomfort and pain to animals; and
- (5) A description of any euthanasia method to be used.

***Protocol did not contain sufficient detail regarding the drugs and dosages to be used for surgical procedures; it only mentioned that "a small amount of tranquilizer and/or pain medicine... will be given prior to induction". It also did not describe post-operative monitoring procedures. Protocols should contain the name and dosage of all drugs to be used, as well as the frequency/timing. It should also have a complete description of any monitoring procedures used to assure that pain is adequately controlled post-operatively. Correct by April 30, 2006.
