Inspection

Type: ROUTINE INSPECTION

Date: NOV-14-2005

2.31 (d) (1) (ii)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

The principal investigator has considered alternatives to procedures that may cause more than momentary or slight pain or distress to the animals, and has provided a written narrative description of the methods and sources, e. g., the Animal Welfare Information Center, used to determine that alternatives were not available;

***Protocol involved the use of eye coils, but did not include an adequate alternative search for current alternative methods available. Key words searched did not include anything related to eye coils or eye movement recording. Need to expand alternative search to incorporate all appropriate keywords and also to explain why available alternatives were not used. Note: The investigator involved in this protocol is currently using an alternative to the eye coil on another more recently reviewed protocol. Correct by January 15, 2006.
