Customer ID: 1503

Certificate: 74-R-0049

12852 PARK ONE DRIVE  
SUGAR LAND, TX 77478

Site: 001

STILLMEADOW, INC.

Inspection

Type: ROUTINE INSPECTION

Date: JAN-26-2006

**3.1 (c)(3) REPEAT NCI  
HOUSING FACILITIES, GENERAL.**

Hard surfaces with which the dogs or cats come in contact must be spot cleaned daily and sanitized in accordance with section 3.11 (b) of the subpart to prevent accumulation of excreta and reduce disease hazards. It was noted that the wall surface of the primary enclosures housing dogs throughout the facility contained dried excreta. Three stainless steel partitions of three dogs were eroded and the chain link fence gates throughout the entire facility contained dried excreta. These noncompliant items were discussed and explained to management the importance of sanitation to prevent accumulation of excreta on contact hard surfaces and reduction of disease hazards. The stainless steel partitions need to be replaced. The walls and the chain link fence gates need to be cleaned.

**3.6 (a)(2)(x) REPEAT NCI DIRECT  
PRIMARY ENCLOSURES.**

Primary enclosures must be designed, constructed and maintained so that they have floors that are constructed in a manner that protects the dogs' and cats' feet and legs from injury, and that, if of mesh or slatted construction, do not allow the dogs' and cats' feet to pass through any openings in the floor. The primary enclosures for six cats were noted to contained slats that allowed the cats' feet to pass through openings in the floor. This noncomplaint item needs to be corrected to protect the animals from injury.

THIS IS THE CORRECTED INSPECTION REPORT THAT REPLACES THE ONE ISSUED EARLIER.

The last routine inspection and exit review were conducted on 12/06/05. This routine inspection and exit review were conducted with management and USDA VMO, Earnest Johnson and USDA SACS, Daniel Jones.

Inventory: 91-dogs, 6-cats, 129-rabbits, 90-guinea pigs and 13-pigs.
