

Ending NIH Dog Abuses From [The White Coat Waste Project](#) April 2024

*The White Coat Waste Project (WCW) is on a mission to **get the U.S. government out of the dog testing business**. We're fighting to end these experiments at the National Institutes of Health (NIH)—the kingpin of wasteful government spending.*

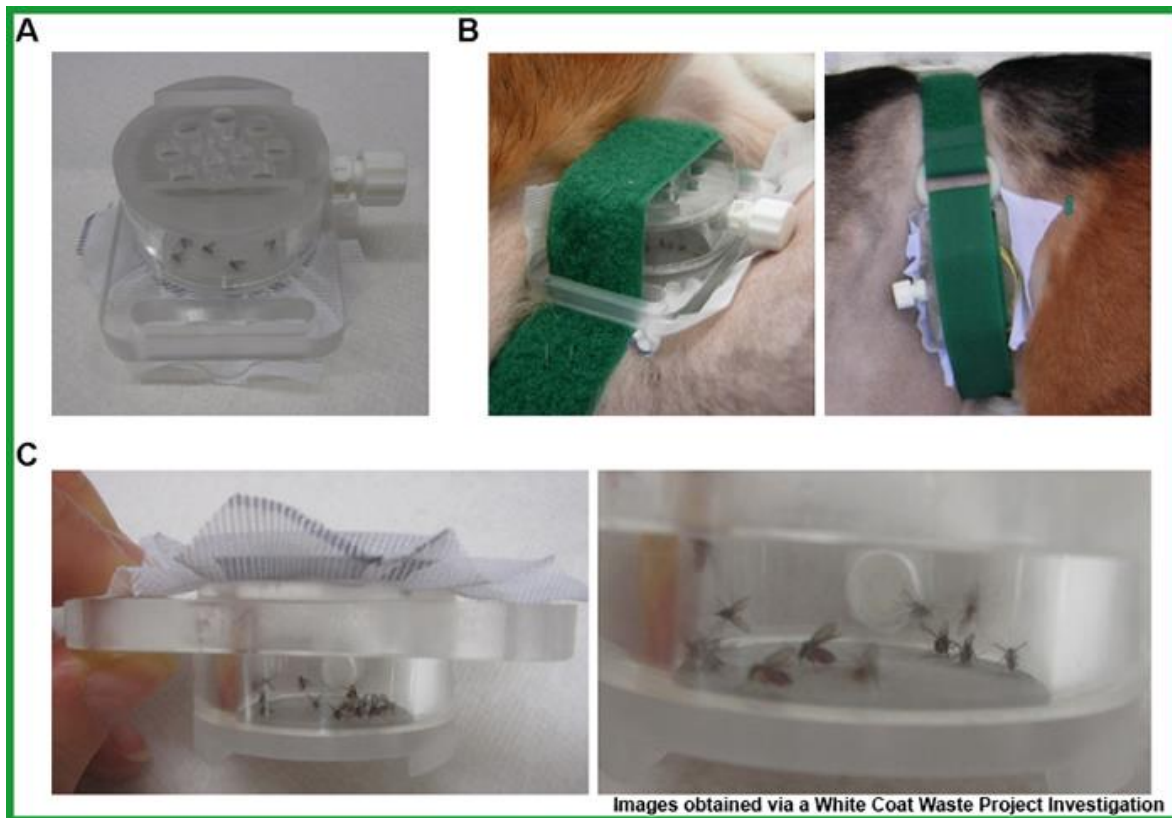

Below, please find your campaign progress report (and a top 11 taxpayer-funded target list). Then, tell Congress: don't waste one more penny on puppy experiments!

Our #BeagleGate campaign to end the National Institutes of Health's (NIH) cruel and wasteful experiments on puppies and dogs has gone viral in recent years. We're proud to lead *the* national effort to expose and defund this waste and abuse. In fact, we're the only group to have shut down a government dog lab in nearly 20 years!

Here's a quick overview of what we've uncovered and where we're headed with #BeagleGate:

Back in 2016, our [Spending To Death report](#) first exposed how Dr. Fauci's in-house labs at the NIH strapped capsules full of biting sandflies to beagles' bare skin in maximum pain experiments with no pain relief.

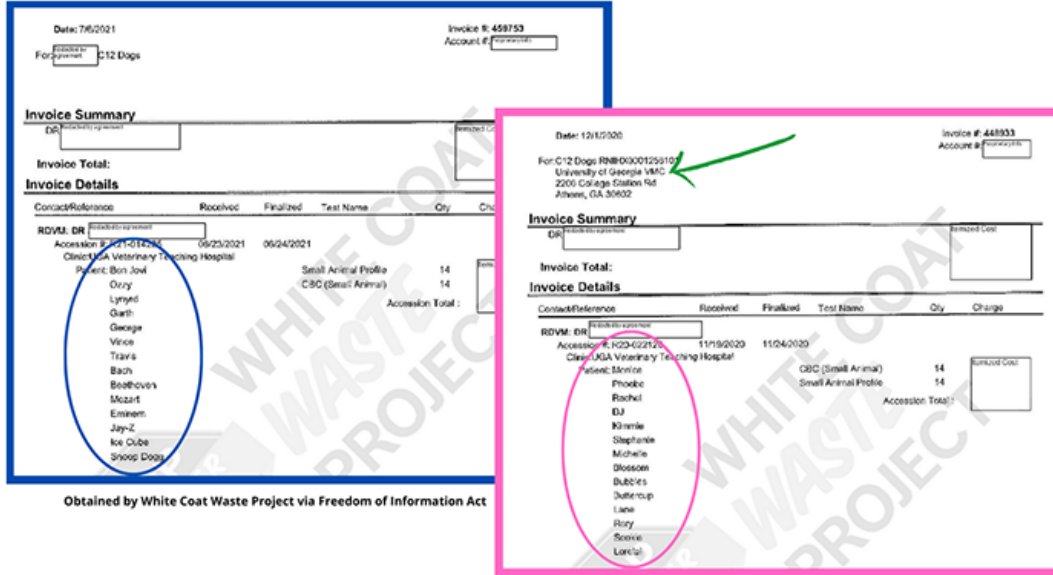

In July 2021, we officially launched our #BeagleGate campaign when we exposed, using the Freedom of Information Act (FOIA), how Dr. Fauci’s National Institute of Allergy and Infectious Diseases (NIAID) shipped over \$400,000 to a lab that infested puppies with biting flies for experiments in which the dogs “vocalized in pain.”

B. Vaccination

The second round of Proprietary Info was administered Dec. 17. Proprietary Info were without incident with one important exception. The 4 animals in the “blue” group all vocalized in pain upon administration of Proprietary Info This did not happen during the first Proprietary Info in November, nor did this happen with any other group. Upon physical exam on Dec. 23, all animals were bright, alert, and responsive.

Obtained via FOIA by White Coat Waste Project

We subsequently obtained documents showing how these Fauci-funded white coats callously named the ill-fated puppies after celebrities, like Snoop Dogg and Ozzy Osbourne, and then tortured and killed them.

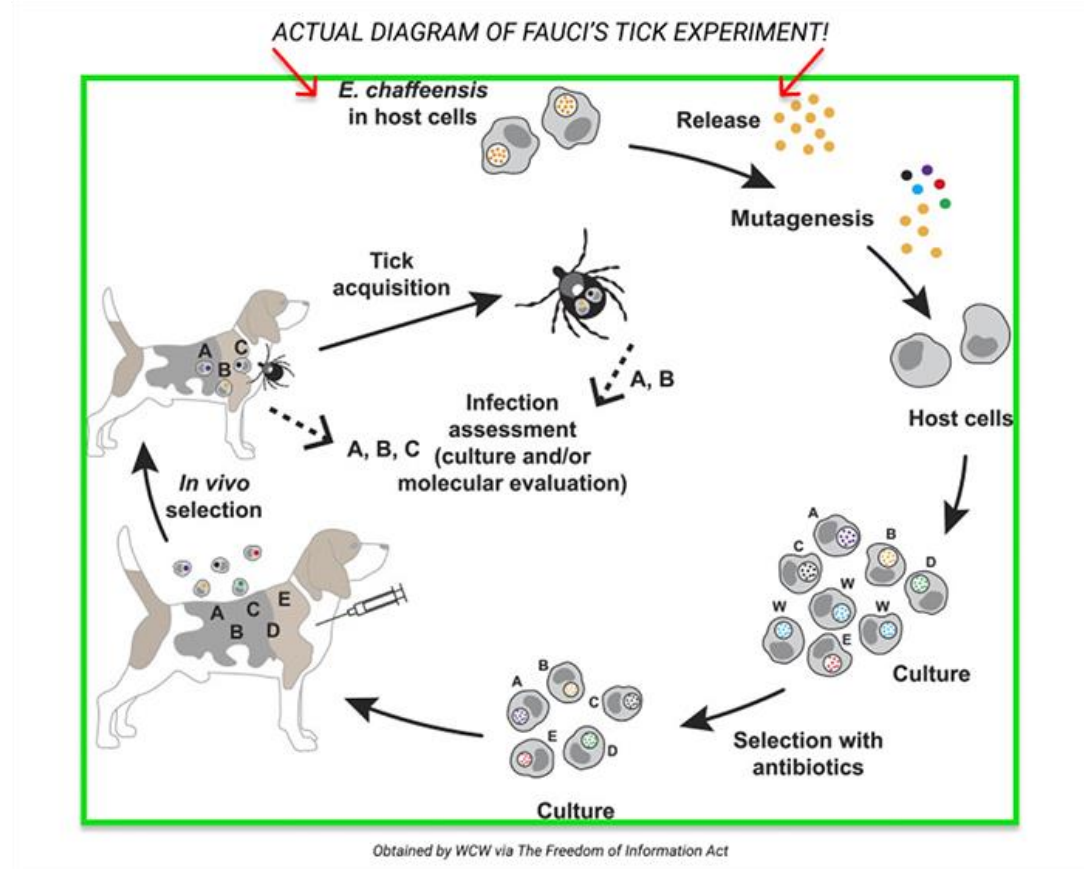

In August 2021, we exposed how Dr. Fauci’s NIAID shipped part of a \$375,000 taxpayer-funded grant to a Tunisian lab that **drugged beagles, locked their heads in cages**, and let them be bitten on the face by hungry sand flies.

It gets worse.

In October 2021, we exposed Fauci-funded white coats who wasted over \$5 million to [infest 138 beagle puppies with hundreds of mutant ticks each.](#)

The same month, we also uncovered a Fauci-funded lab that wasted \$1.68 million to [force-feed puppies experimental drugs and cut out their vocal cords](#) so they couldn't bark or cry out in the lab.

Safety Evaluation of [Proprietary Info] after 28 Days of Repeat Dose Administration in Beagle Dogs
SRI Study No. M393-18

Number of Animals
44 assigned to test

Sex
22 Males and 22 females

Age at First Dose
6-8 months

Weight Range at First Dose
8-11.5 kg (males); 6.5-11 kg (females)

Obtained via FOIA by White Coat Waste Project

In November 2021, we uncovered how Fauci-funded white coats wasted part of a \$6 million grant to infest beagles with heartworms and then kill the dogs and experiment on the worms.

In January 2022, our viral #CokeHounds investigation exposed how NIH wasted \$2 million to inject beagle puppies with cocaine.
